

## General-Purpose Prototyping Board

Prototyping boards with punched holes are convenient, economical tools for assembling circuit components as well as cost-effective alternatives to custom designs.

### Features:

- Board Thickness: 0.062"
- Hole Spacing: 0.10"
- Size (W" x L"): 1.50 x 3.50
- Circuit Pattern: Power/Ground perimeter bus with pad per hole
- Hole Pads: Single-sided
- Number of Holes x Diagonal: 365 x .038"
- Power/Ground Buses: 4
- Number of Mounting Holes x Diagonal: 2 x 0.140"
- Weight: 0.02 lbs. (0.32 oz.)
- PCB Material: Epoxy Glass
- Fits Enclosure: [11957](#)
