

## General-Purpose Prototyping Board

Prototyping boards with punched holes are convenient, economical tools for assembling circuit components as well as cost-effective alternatives to custom designs.

### Features:

- Board Thickness: 0.062"
- Hole Spacing: 0.10"
- Pad size: 0.08"
- PCB Material: Epoxy Glass
- Size (W" x L"): 3.10 x 5.50
- Circuit Pattern: Power/Ground perimeter bus with pad per hole
- Hole Pads: Single-sided
- Number of Holes x Diagonal: 1450 x 0.035"
- Power/Ground Buses: 7
- Number of Mounting Holes x Diagonal: 4 x 0.140"
- Weight: 0.07 lbs. (1.12 oz.)
- Fits Enclosure: [18893](#)
