

General-Purpose Prototyping Board

Prototyping boards with punched holes are convenient, economical tools for assembling circuit components as well as cost-effective alternatives to custom designs.

Features:

- Board Thickness: 0.062"
- Hole Spacing: 0.10"
- Pad size: 0.08"
- PCB Material: Epoxy Glass
- Size (W" x L"): 3.60 x 7.00
- Circuit Pattern: 1 pad per hole
- Hole pads: Single-sided
- Number of Holes x Diagonal: 2225 x 0.035"
- Power/Ground Buses: 4
- Number of Mounting Holes x Diameter: 4 x 0.140"
- Weight: 0.10 lbs. (1.6 oz.)
- Fits Enclosure: [18906](#) and [11973](#)
