

# Component Kit for "Electronics for Kids"

This kit includes over 45 different components, so you can build the circuits from the eBook "Electronics for Kids" by Oyvind Dahl.

## **These are some of the circuits you can build:**

- Solder a blinking LED circuit with resistors, capacitors, and relays
- Turn a circuit into a touch sensor using your finger as a resistor
- Build an alarm clock triggered by the sunrise
- Create a musical instrument that makes sci-fi sounds

...and many more.

The eBook is not included in the kit, but can be found here:
