DFG-2040

DFG-2060

The DFG-2040 & DFG-2060 DDS function generators with high frequency of 40MHz and 60MHz are designed based on Direct Digital Synthesis (DDS) technology providing flexible performance and system features for basic scientific and industrial requirements.

The 10 bits resolution, 180MSa/s sampling rate, 16k pts memory length, and 32 built-in waveforms create various waveforms for different needs. PC software for USB and RS-232 interfaces control and 200MHz frequency counter are provided.

These models have additional functions of multiple modulations FM, AM, FSK, ASK and PSK, 40 sets memories and multiple protections. Low-cost, multi-functional, high accuracy and low distortion make them an ideal solution for an accurate and affordable signal source for industrial, scientific research and educational applications.
